

Food production

must expand greatly in the coming decades

Energy production

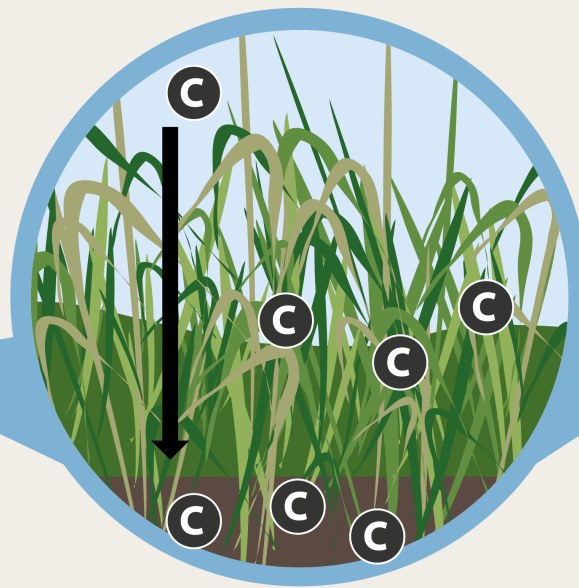

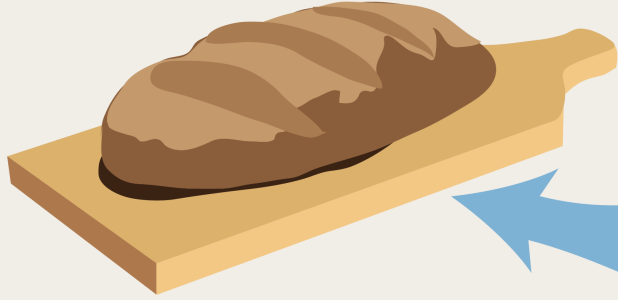

must also expand greatly

But if both expand without changes

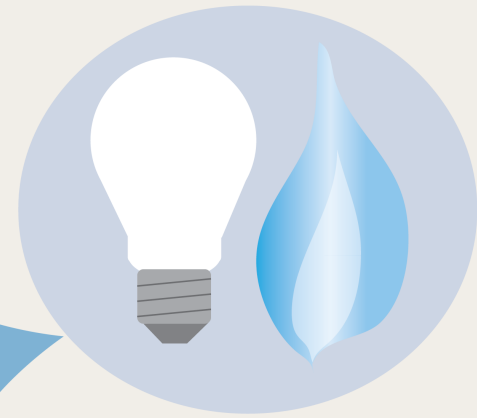

There will be no hope of halting
climate change

**Produce
Food**

Store Carbon

**Generate
Energy**

Therefore we must

Integrate Food and Energy Production

To remove net carbon from the atmosphere

Biogasdoneright™

Removes net carbon

Expands food and **energy** production

Provides **economic** and **environmental** benefits

Biogasdoneright™ Can Benefit Farmers and the World
